Skills
JavaScript, React, Redux, Angular, TypeScript, Node.js, PHP, Mongo DB

Work Experience

Software Engineer II · Buffer · 2018–Present

• Currently on the Core team, developing new global account tools to provide centralized solutions for Buffer customers using multiple products in our platform
• Creating new APIs that can be shared across products, as well as writing and executing migration scripts to move data out of individual product's DB, into a new core DB
• Previously on the Reply team, added both APIs and front-end features to the Buffer Reply product

Software Engineer III · Hy-Vee · 2017–2018

• Added online pharmacy services to hy-vee.com, like online prescription refills, SMS reminders and family account access
• Created an SMS notification app to send real-time updates, to both customers and employees, for online grocery orders
• Mentored junior engineers and interns, helping them learn the basics of TDD and React-Redux

Software Engineer · Source Allies · 2016–2017

DuPont Pioneer · Software Engineer Consultant · 2016–2017
• Developed a responsive web application for growers of Pioneer hybrid plants, using C# .NET, Angular TypeScript, and Material Design

Source Allies · Summer Intern Program Mentor · 2016
• Lead a team of summer apprentices on an internal project, to help them learn about pair programming, test driven development, React-Redux, and Java

Software Engineer · Principal · 2015–2016

• Developed a new server-side application for the 401k and retirement website with Java Spring

Education

Iowa State University · B.S. Computer Engineering · 2015
