Skills
JavaScript, PHP,
TypeScript, GraphQL,
Node.js, React-Redux,
Mongo DB

Work Experience

Software Engineer II *Core* • Buffer • 2018–Present
• Planning & developing new global account tools, like single sign-on and centralized payments, for customers using multiple Buffer products
• Creating new APIs that can be shared across products, using GraphQL and Express, and writing data migration scripts to organize shared data into new Core MongoDB
• Using AWS SQS & SNS to process payment events from Stripe, as well as send tracking analytics to Segment
• Organizing & facilitating Core team Backlog Grooming and Knowledge Sharing meetings, as well as leading cross-team Backend Engineering meetings

Software Engineer III *Pharmacy* • Hy-Vee • 2017–2018
• Added online pharmacy services to hy-vee.com, like online prescription refills, SMS reminders and family account access
• Created an SMS notification app, working with Twilio, to send real-time updates, to both customers and employees, for online grocery orders
• Mentored junior engineers and interns, helping them learn the basics of TDD and React-Redux

Software Engineer • Source Allies • 2016–2017
DuPont Pioneer • *Software Engineer Consultant* • *2016–2017*
• Responsive web application for growers of hybrid plants, using C# .NET, Angular TypeScript, and Material Design
Source Allies • *Summer Intern Program Mentor* • *2016*
• Lead a team of apprentices on an internal project, Resume Builder, to help them learn about pair programming, test driven development, React-Redux, and Java

Software Engineer *Retirement* • Principal • 2015–2016
• Developed a new Java application for the 401k and retirement website

Education

Iowa State University • B.S. Computer Engineering • 2015
